FATHIMA THANKAYATHIL

SENIOR JAVA SOFTWARE ENGINEER | APPLICATION/ PRODUCT SUPPORT ENGINEER

Open to Remote Opportunities | +91 8593907441 | fathima.thankayathil@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Software Engineer with 7+ years of experience in Java backend development, enterprise application development, troubleshooting, and production issue resolution. Experienced in developing and supporting enterprise applications using Java , with hands-on experience working with APIs, databases, and CI/CD environments. Strong experience in debugging, root-cause analysis, dependency management, security remediation, customer issue resolution, and cross-functional collaboration. Hands-on experience with AWS, Docker, Kafka, PostgreSQL, Elasticsearch, Jenkins, GitHub, Splunk, and Coralogix.

Technical Skills

Programming: Java
Backend Development: Java Backend Development, Spring Boot, Microservices, REST APIs, API Integration, Enterprise Applications, Application Development, Backend Troubleshooting, Application Maintenance
Databases: PostgreSQL, Elasticsearch
Cloud & Infrastructure: AWS, Docker
Messaging & Integration: Kafka
Build, CI/CD & Version Control: Gradle, Jenkins, CloudBees, Git, GitHub, LaunchDarkly
Testing & API Tools: JUnit, Mockito, Postman, API Testing, Debugging
Monitoring & Observability: Splunk, Coralogix
Security: Snyk
Enterprise Tools: Jira, ServiceNow
AI-Assisted Development: GitHub Copilot, Claude
Core Engineering: Root Cause Analysis, Bug Investigation, Troubleshooting, Incident Investigation, Technical Issue Resolution

PROFESSIONAL EXPERIENCE

Staff Software Engineer Jan 2025 – May 2026
Cloud1 Software India Private Limited | Bangalore, India *Remote*

- Developed and maintained **Java-based enterprise applications**, contributing to backend functionality, REST API integration, production troubleshooting, and application reliability.
- Investigated and resolved **50+ customer-reported software issues** through issue reproduction, code analysis, log investigation, root-cause analysis, and cross-functional collaboration.
- Analyzed **end-to-end application workflows and service interactions** to identify component-level failures, investigate integration issues, and coordinate technical resolutions across engineering teams.
- Improved **application reliability and operational stability** by investigating recurring incidents, identifying underlying causes, and implementing corrective fixes and recovery workflows.
- Collaborated with engineering teams to review application behavior, investigate code changes, troubleshoot backend services, and support maintainable technical solutions.
- Supported **application security and operational quality** through dependency investigation, technical issue resolution, and production support activities.
- Provided **technical guidance and mentoring** to fellow engineers on Java development, debugging techniques, root-cause analysis, and application troubleshooting.
- Participated in and led **peer code reviews**, promoting coding standards, maintainability, defect prevention, and engineering best practices.

Senior Software Engineer Feb 2024 – Dec 2024
Cloud1 Software India Private Limited | Bangalore, India *Remote*

- Developed and maintained **Java-based asset management functionality**, including static and dynamic tagging, tag rules, asset filtering, and exclusion workflows.

- Implemented and supported enterprise application features managing **10,000+ assets**, contributing to scalable asset organization and tagging operations.
- Investigated **Elasticsearch performance and processing issues** affecting asset tagging workflows, identifying root causes of delayed and failed tagging operations.
- Developed scheduled recovery and reprocessing workflows to restore failed asset tagging operations and improve **application reliability and operational stability**.
- Collaborated with engineering teams on **backend troubleshooting, technical solution design, debugging, testing, and application improvements**.
- Provided **technical guidance to engineering teams** on backend implementation, root-cause analysis, application troubleshooting, and maintainable software solutions.

Senior Software Engineer Jan 2021 – Jan 2024
Delixus Software India Private Limited | Bangalore, India *Remote*

- Developed and maintained **Java-based enterprise application functionality** for security findings, asset visibility, and security analysis workflows.
- Contributed to backend application enhancements, technical issue investigation, and implementation of maintainable software solutions.
- Identified and resolved **30+ Snyk-reported security vulnerabilities and dependency issues**, strengthening application security and supporting secure dependency management.
- Collaborated with engineering teams on application debugging, code-level issue investigation, defect resolution, and continuous application improvements.

Software Engineer Sep 2018 – Dec 2020
Delixus Software India Private Limited | Bangalore, India *On-site*

- Contributed to development of a **data analysis platform** supporting application analysis and container-to-cloud migration.
- Developed application functionality supporting **container-to-cloud migration and cloud integration workflows**.
- Worked on functionality connecting enterprise applications with **AWS services through AWS connectors**.
- Contributed to **AWS cloud integration** functionality supporting integration and management of AWS services.
- Investigated and resolved application issues by analyzing application behavior, logs, and integration workflows.

Projects

AI-Powered Support Triage System | Full-Stack Java & React Project *Nov 2026*
Technologies: Java 21, Spring Boot 4, Spring Framework 7, React.js, REST APIs, PostgreSQL, Google Gemini, Neon, Render, Git, GitHub

- Developed and deployed a full-stack AI-powered support ticket management application using React, Java Spring Boot, and PostgreSQL.
- Integrated Google Gemini AI to analyze technical incidents and automatically recommend ticket categories and priorities.
- Implemented AI-generated technical summaries and troubleshooting recommendations to assist support engineers with incident investigation.
- Designed and implemented REST APIs for ticket creation, retrieval, and AI-powered incident analysis.
- Implemented rule-based ticket classification as a fallback when AI analysis is unavailable.
- Integrated Neon PostgreSQL for persistent ticket storage and deployed the frontend and backend independently on Render.
- Performed end-to-end testing of AI analysis, ticket creation, category and priority assignment, and database persistence.
- Designed and implemented the **backend service architecture**, defining REST API endpoints, ticket management workflows, database persistence, and integration boundaries between React, Spring Boot, and PostgreSQL.

Live Demo: AI-Powered Support Triage System

Support Triage System | Full-Stack Java & React Project *Oct 2026*
Technologies: Java 21, Spring Boot 4, Spring Framework 7, React.js, REST APIs, PostgreSQL, Neon, Render, Git, GitHub

- Developed and deployed a full-stack support ticket management application using React, Java Spring Boot, and PostgreSQL.
- Designed and implemented REST APIs for CRUD operations (Create, Read, Update, Delete) on support tickets.
- Implemented rule-based ticket classification to automatically assign categories and priorities based on issue descriptions.
- Built an interactive dashboard with ticket statistics, search, filtering, sorting, and ticket status management.
- Integrated Neon PostgreSQL for persistent data storage and deployed the frontend and backend on Render.
- Performed end-to-end testing of ticket creation, editing, deletion, and database persistence.
- Designed and implemented the **backend service architecture**, defining REST API endpoints, ticket management workflows, database persistence, and integration boundaries between React, Spring Boot, and PostgreSQL.

EDUCATION

Centre for Development of Advanced Computing (C-DAC) Feb 2018 – Aug 2018
PG Diploma in Advanced Computing (PG-DAC) *Bangalore, India*

University of Calicut Aug 2013 – Aug 2017
Bachelor of Technology (B.Tech), Computer Engineering *Kerala, India*

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

3-Hour Claude AI Mastery Workshop — *EDAPT* Sep 2026
AI Tools and Claude Workshop — *BE10X* Sep 2026
Create Engaging Video with Google Vids — *SIMPLILEARN* Sep 2026
Amazon Q Developer for Java Course — *SIMPLILEARN* Oct 2026
How to break into AI roles in companies like OpenAI, Comma, Emergent ? — *SCALER* Oct 2026
