LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Java Software Engineer with **7+ years of experience** in Java backend development, enterprise applications, and production support. Skilled in Spring Boot, REST APIs, PostgreSQL, AWS, debugging, and root cause analysis. Experienced in API integrations, security remediation, mentoring, and production troubleshooting; recently built and deployed full-stack and AI-assisted applications.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Microservices, REST APIs
Frontend & Data: React.js, JavaScript, HTML, CSS, PostgreSQL, Elasticsearch, Kafka
Cloud & DevOps: AWS, Docker, Gradle, Jenkins, CloudBees, Git, GitHub
Testing & Monitoring: JUnit, Mockito, Postman, Datadog, Splunk, Coralogix, Snyk
Support & Tools: Debugging, RCA, Production Support, Jira, ServiceNow, LaunchDarkly
AI Tools: OpenAI Codex, GitHub Copilot, Claude AI, ChatGPT, Google Gemini

PROFESSIONAL EXPERIENCE

Staff Software Engineer Jan 2025 – May 2026
Cloud1 Software India Private Limited | Bangalore, India *Remote*

- Developed and supported Java enterprise applications, backend services, and REST API integrations; investigated and resolved **50+ customer issues** through reproduction, log analysis, debugging, and root cause analysis.
- Improved application reliability through corrective fixes, automated recovery workflows, and cross-team production troubleshooting.
- Mentored junior developers, reviewed pull requests, and maintained code quality.

Senior Software Engineer Feb 2024 – Dec 2024
Cloud1 Software India Private Limited | Bangalore, India *Remote*

- Developed Java asset management features for static/dynamic tagging, rules, filtering, and exclusion workflows supporting **10,000+ assets**.
- Diagnosed Elasticsearch bottlenecks and built scheduled recovery/reprocessing jobs for failed tagging operations, reducing manual intervention.

Senior Software Engineer Jan 2021 – Jan 2024
Delixus Software India Private Limited | Bangalore, India *Remote*

- Developed Java backend features for security findings, asset visibility, and analysis; debugged defects and delivered enhancements.
- Remediated **30+ Snyk-reported security vulnerabilities**, including dependency issues, to improve application security.

Software Engineer Sep 2018 – Dec 2020
Delixus Software India Private Limited | Bangalore, India *On-site*

- Developed Java features for an enterprise data analysis platform and cloud migration workflows.
- Built and supported AWS connectors, troubleshooting integration and application issues through debugging and testing.

PROJECTS

Support Triage Systems (Rule-Based & AI-Powered) *Oct–Nov 2026*
Personal Projects | **Stack:** Java 21, Spring Boot 4, React, PostgreSQL, Gemini AI, Neon, Render

- Built and deployed two independent full-stack ticket management applications with REST CRUD APIs, React dashboards, filtering, and status management.
- Implemented rule-based incident classification and Gemini-powered category/priority suggestions, technical summaries, and troubleshooting guidance with fallback.
- Used separate Neon databases and Render deployments; implemented **50 automated tests** (32 AI-powered, 18 rule-based) across backend and frontend.

AI-Powered: Live Demo | Source Code: Private Repository
Rule-Based: Live Demo | Source Code: Private Repository

APIForge AI – REST API Troubleshooting Workbench *Nov 2026*

Personal Project | **Stack:** Java 21, Spring Boot, React, PostgreSQL, OpenAI Codex, Render

- Built and deployed a full-stack workbench for pasted HTTP request/response inspection, JSON validation, HTTP status analysis, and troubleshooting suggestions.
- Implemented rule-based diagnostics and test-scenario ideas with Gemini-ready architecture; live Gemini calls are disabled.
- Used **OpenAI Codex** for AI-assisted implementation and debugging, with functional verification.

Live Demo: APIForge AI | Source Code: Private Repository

EDUCATION

Centre for Development of Advanced Computing (C-DAC) Feb 2018 – Aug 2018
PG Diploma in Advanced Computing (PG-DAC) | Bangalore, India

University of Calicut Aug 2013 – Aug 2017
Bachelor of Technology (B.Tech), Computer Engineering | Kerala, India

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

Amazon Q Developer for Java Course – Simplilearn (Oct 2026)
3-Hour Claude AI Mastery Workshop – EDAPT (Sep 2026)
AI Tools and Claude Workshop – BE10X (Sep 2026)
